CineGrid Project Groups Intro

Tom DeFanti & Cees de Laat

University of Amsterdam
CALIT2
Structure

• Project groups are bottom up grass roots community efforts!

• Project groups happen to come into existence because the community sees a need for a forum on a certain subject.
  – To have one place to meet/contact experts on a particular subject
  – To have a discussion, make conceptual progress, knowledge exchange
  – To organize infrastructure, experiments, demonstrations, middleware/tools

• Project groups have a lightweight structure:
  – 1 or 2 co-chairs
  – Possibly a liaison to the executive committee
  – Will meet at annual CG event, possibly at interim meetings (NAB, IBC, SC, …)

• Project groups will happen because they serve the communities needs, not because we say so!

• Examples: CineGrid Exchanges, CineGrid Network, ?
Plan for the rest of the week

• Meet Tuesday and Wednesday during lunch
• Get a table marker from Nathalie
• Write down the subject of your project on the marker, catch a table and collect people at your table
• If possible take notes that can be published on the web site, collect slides, send to CG-secretariat
• Make small few slides summary
• There may be an opportunity for (co-)chairs to present Wednesday in the closing session to present a few minutes; contact Laurin.
CineGrid Network Engineering WG

☐ From the mission: Networked Media
☐ I note room for improvement in connectivity between CG exchanges
☐ Need for persistent topology of 1/10 gig links between exchanges
☐ Include monitoring of these links
☐ Replication can serve as benchmark
☐ Volunteers?
Need for Scientific Publications!
Status ;-)!

- Guest Editors:
  Naohisa Ohta & Paul Hearty & Cees de Laat
- Special section on CineGrid!
- About 14 papers
- Hope to get it published around summer 2011.
